ABOUT US

Who we are

Podoblock is the global leader in accessories and tools for the imaging market. We reimagine and reinvent the way imaging professionals in the veterinary field worldwide make quick and safe X-rays and ultrasounds with enhanced efficiency and mobility.

We believe that safety for imaging professionals is crucial when exposed to hazardous environments, and efficiency is necessary for a fast-paced profession, so we innovate solutions to help practitioners stay safe and efficient with enhanced mobility. In addition, we design, build and test each piece of equipment to ensure our quality and your safety.

Our History

Podoblock has always set the bar for high quality solutions by constantly innovating to improve our customers' efficiency and safety. With almost 30 years of gained working professionally with horses, and 15 years in the medical device industry, we listen to our customers and develop expertise in innovating durable, high standard, and practical solutions for every daily job.

Innovative Solutions Today

New technologies continue to evolve. Our goal is to invest more in solutions development to align with the market needs and the technologies as they develop.

Made in Holland

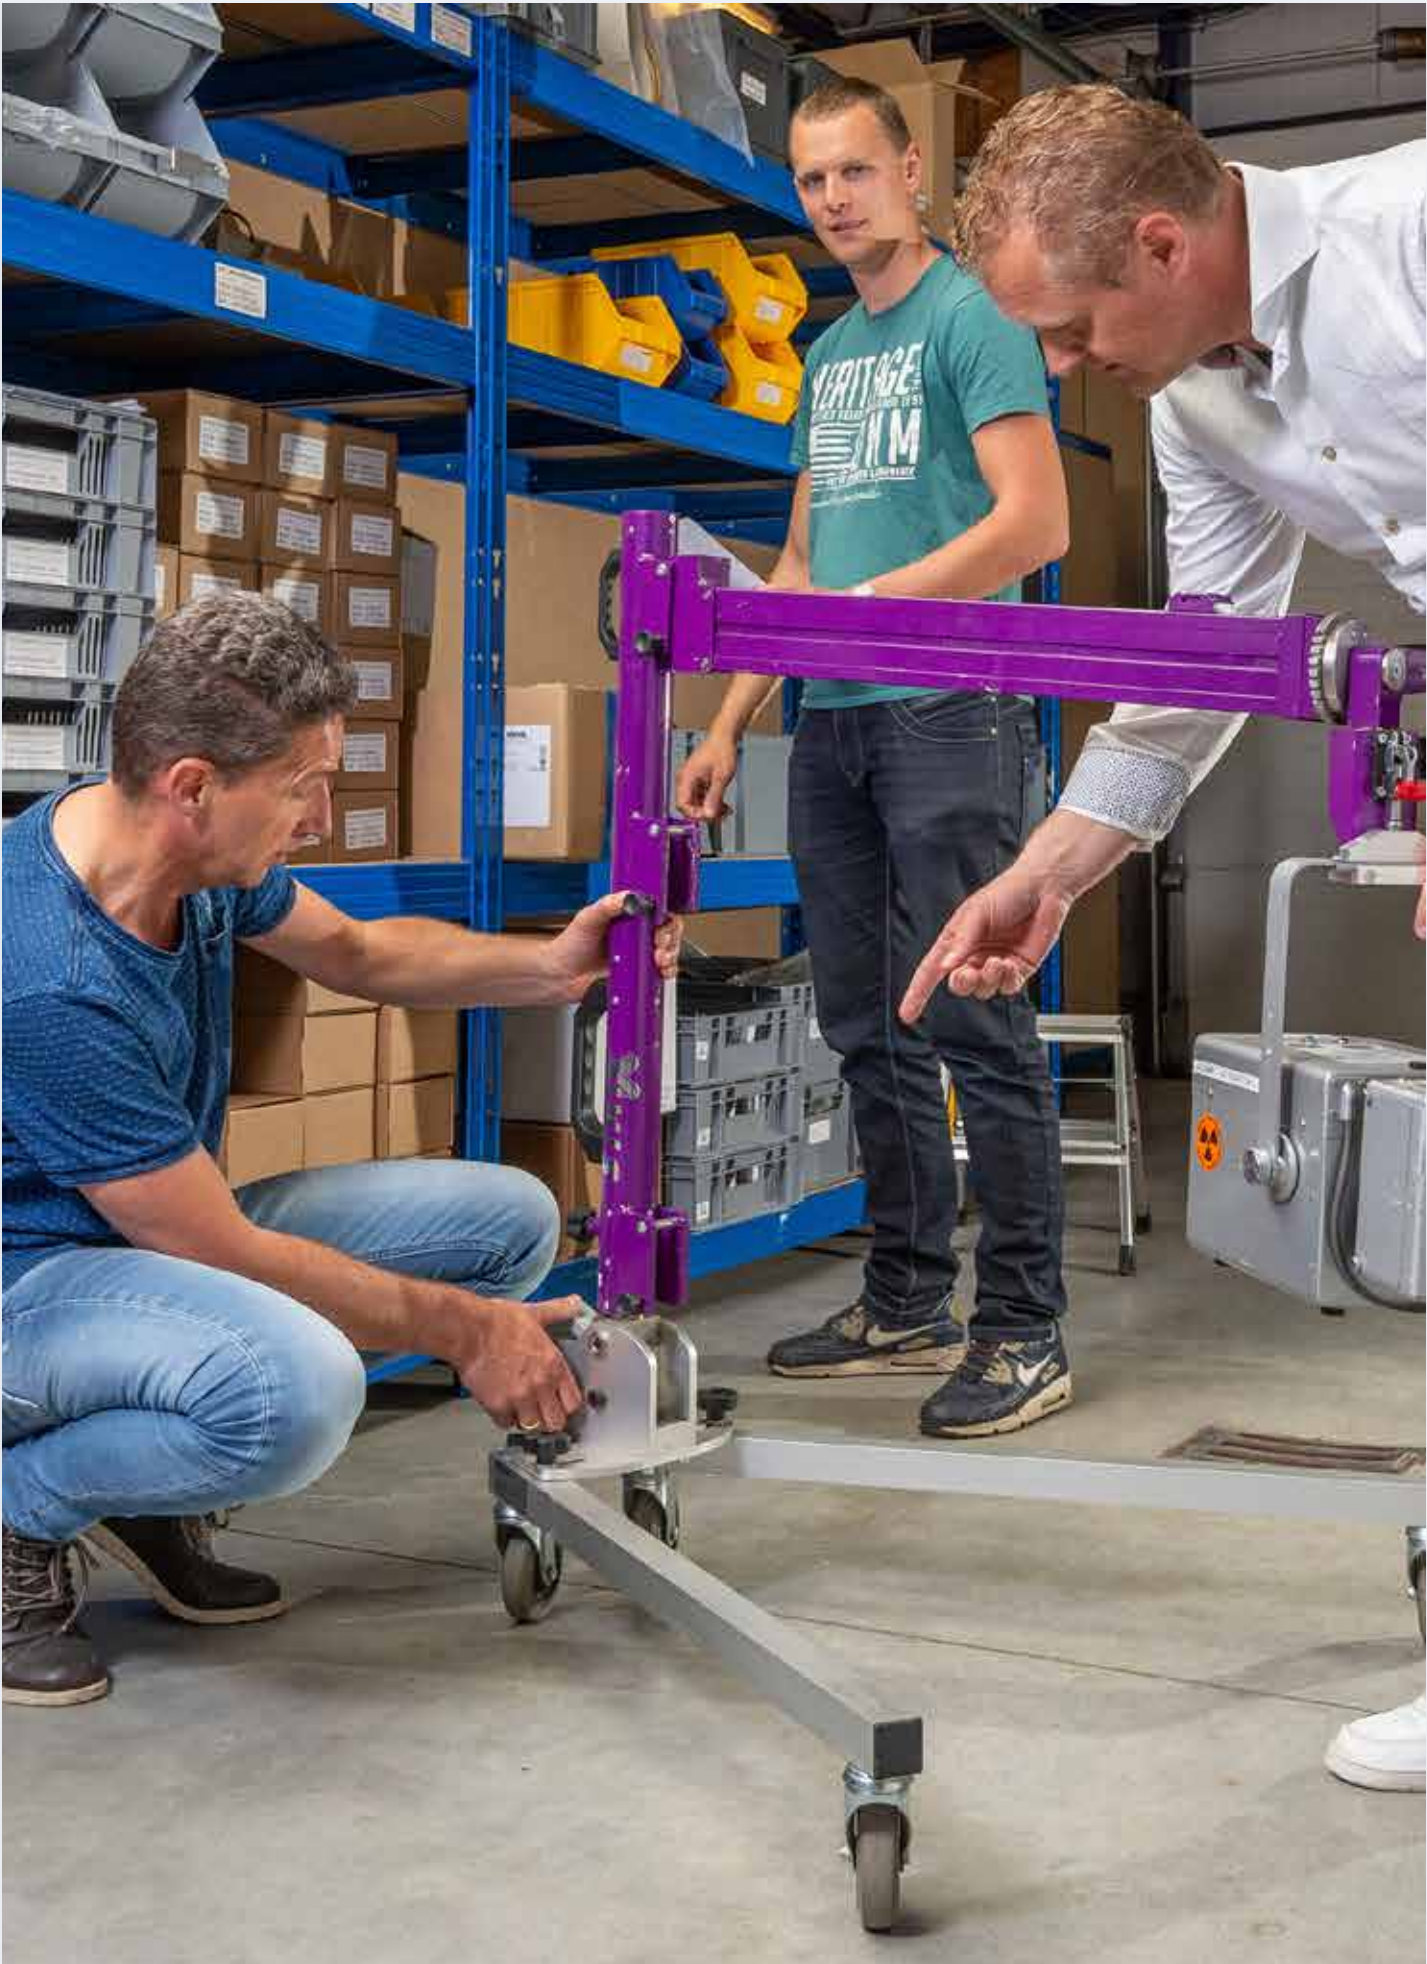

All products are made in the Netherlands, and we choose only the highest quality material.

Deliverability

We offer a worldwide delivery service through 2 warehouses in the Netherlands and Florida in the USA.

Service and repairs

Our products are made of the highest quality materials, but there can always happen something. In that case, we provide remote service and repair with proper instructions or do it ourselves from our in-house repair service.

CHAPTER 1

PODOBLOCK

At Podoblock, we recognize the challenges that equine veterinarians face daily. From the onset of our business in 2008, we have been aware of the hurdles that come with equine X-raying.

Our very first contraption, the Podoblock, has been a whopping success ever since. It always guarantees the same angle in every position, and it maximally minimizes radiation because of the hands-free system.

The Podoblock is robust, solid and almost indestructible. It comes in 3 different heights and has several optional extras and add-ons, laid out for you on the following pages.

Podoblock

- Made of aluminium base and a synthetic PE500 top piece
- Weight Podoblock: 14.3 lbs
- 4 rubber feet
- Includes 1 Topblock of your choice
- LM / AP / 45° Hands-free system
- Avoids fingers on your X-ray
- Height from ground to tip-off hoof in Podoblock is either 3.54" (90 mm), 4.72" (120 mm) or 6.69" (170 mm)

Abbreviation:
BE = Base Element
TB = Topblock
UP = Upright Pedal

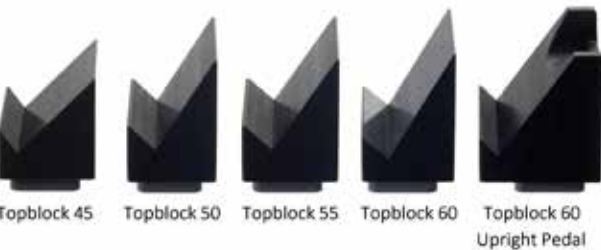

Product	Itemnumber	Price
Base Element 90 mm	PB 01AL090	\$ 475.00
BE 90mm + TB 45°	PB 01AL090-45	\$ 695.00
BE 90mm + TB 50°	PB 01AL090-50	\$ 695.00
BE 90mm + TB 55°	PB 01AL090-55	\$ 695.00
BE 90mm + TB 60°	PB 01AL090-60	\$ 695.00
BE 90mm + TB 60° UP	PB 01AL090-60 UP	\$ 695.00
Base Element 120 mm	PB 01AL120	\$ 475.00

Topblock + Optional Wedge

Easily interchangeable radiolucent blocks for our Podoblock with an angle diversity 45° to 60° with 5° increments.

- Made of synthetic PE500
- Available in black only

Product	Itemnumber	Price
Topblock 45°	TB 0250045	\$ 220.00
Topblock 50°	TB 0250050	\$ 220.00
Topblock 55°	TB 0250055	\$ 220.00
Topblock 60°	TB 0250060	\$ 220.00
Topblock 60° Upright Pedal	TBD 0250060	\$ 220.00
Topblock Wedge 10°	TBW 0250010	\$ 110.00

Topblock Flatplate LM / AP/ 45°

- For LM / AP / 45° takes with the foot standing flat or upright pedal.
- Anti-slip surface
 - Made of synthetic PE500
 - Available in black only

Product	Itemnumber	Price
Topblock Flatplate AP	TBF 02500AP	\$ 265.00
Topblock Flatplate LM / AP	TBF 02500LMAP	\$ 265.00
Topblock Flatplate LM / AP/45°	TBF 0250045	\$ 265.00

MagRayCloxx

Magnetic X-ray block that greatly enhances both your and the horse's mobility and working speed. The blocks stay on the horse while making oblique X-rays.

The block has a clean break-over and a cut lateral and medial edge.

The cloxx can be used with or without (radiolucent) foil that is wrapped around the horse's shoe for safe fixation, and even works on a barefoot horse.

- Made of synthetic PE500
- Size: L 6.1" x W 6.3" x H 2.4"
- Clean break-over on both front and side
- Magnets to fix to the horseshoe
- Bottom of Cloxx padded with anti-slip rubber strips
- Comes with radiolucent foil for extra fixation

Design:
Dr. Joachim Onderka

Product	Itemnumber	Price
2 Blocks / 1 Hand dispenser / 5 Foil rolls	MRC 01SET2-5	\$ 545.00
4 Blocks / 1 Hand dispenser / 12 Foil rolls	MRC 01SET4-12	\$ 990.00 *
1 Hand dispenser / 12 Foil rolls	MRC 01FOIL1-12	\$ 90.00

* Combi-deal: \$ 100 discount on sale price.

CR CASSETTE SOLUTIONS

Computed radiography (CR) systems are still much in use in the veterinary world.

At Podoblock we offer a complete product line in order to enable your CR system for your equine tasks, outlined for you on the following pages.

Podoholder

To be used in combination with our Podoblock and Combibox. It protects your cassette and always secures the right positions for standard hoof exams.

Optional to the Podoholder are the Podoholder Lead and Podoholder Grid. If you want to use a Grid or Backscatter lead, please contact us for optional possibilities.

Size	Itemnumber	Price
18 x 24 cm	PH 03182418	\$ 175.00
24 x 30 cm	PH 03243018	\$ 175.00
35 x 43 cm Horizontal	PHB 03354318	\$ 260.00
8" x 10"	PH 03232818	\$ 175.00
10" x 12"	PH 03283318	\$ 175.00

Please note: this Protection cover is a sub-optimal solution in combination with our Podoblock or CR-Combibox.

Protection Cover

The Protection Cover is a standard plane casing for your Analogue and CR Cassettes.

It comes with a Velcro fastener to secure the Cassette and is made of strong Polycarbonate.

Size	Itemnumber	Price
18 x 24 cm	CRP 03182418	\$ 175.00
24 x 30 cm	CRP 03243018	\$ 175.00
35 x 43 cm Horizontal	CRPH 03354318	\$ 260.00
8" x 10"	CRP 03232818	\$ 175.00
10" x 12"	CRP 03283318	\$ 175.00

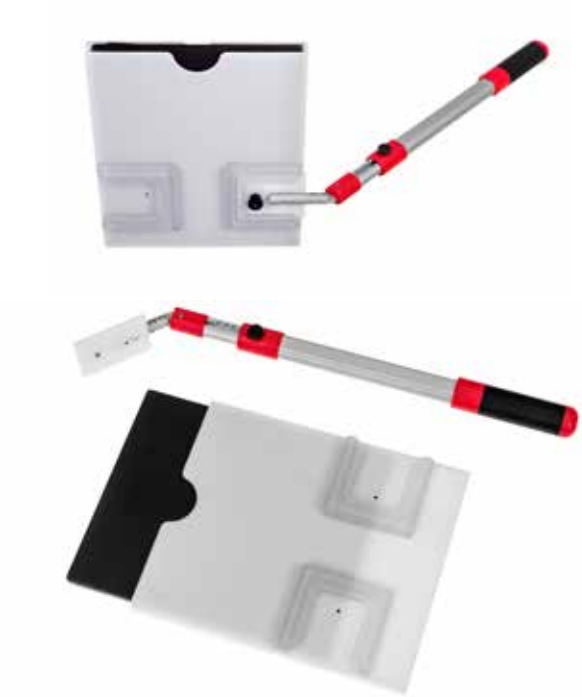

Knee Holder

Easy to use distance holder - especially for knee exams - that creates maximum distance and safety.

Standard supplied with a telescopic stick can be adjusted to the left or the right in a split second.

- Made of 3 mm polycarbonate
- For use with all Analogue and CR cassettes

Size	Itemnumber	Price
18 x 24 cm	KH 04182418	\$ 375.00
24 x 30 cm	KH 04243018	\$ 375.00
8" x 10"	KH 04232818	\$ 375.00
10" x 12"	KH 04283318	\$ 375.00

Distance Cassette Holder

Polycarbonate cassette and stick to create maximum distance from the radiation as well as from the horse. Comes with a 3D-adjustable telescopic stick with only one knob for securing.

- Weight: 3.3 lbs
- Made of super strong durable lightweight polycarbonate

Size	Itemnumber	Price
DCH 18 x 24	AC 04182418	\$ 445.00
DCH 18 x 24 Fetlock	ACK 04182418	\$ 445.00
DCH 24 x 30	AC 04243018	\$ 445.00

DCH 8" x 10"	AC 04232818	\$ 445.00
DCH 8" x 10" Fetlock	ACK 04232818	\$ 445.00
DCH 10" x 12"	AC 04283318	\$ 445.00

Distance Cassette Holder with Foot Option

They are crafted to create maximum distance from the radiation as well as from the horse. It comes with a 3D-adjustable telescopic stick with only one knob for securing.

Telescopic foot available in 2 lengths:

- Short: 11" - 19" for hock
- Long: 39" - 75" for back/neck
- Weight: 3.3 lbs - with foot: 4.2 lbs
- Made of super strong, durable, lightweight polycarbonate

Size	Itemnumber	Price
DCH 18 x 24 + Short Foot	ACS 04182418	\$ 545.00
DCH 24 x 30 + Short Foot	ACS 04243018	\$ 545.00
DCH 35 x 43 + Long Foot	ACBS 04354318	\$ 595.00
DCH 8" x 10" + Short Foot	ACS 04232818	\$ 545.00
DCH 10" x 12" + Short Foot	ACS 04283318	\$ 545.00
Optional Support Foot (S)	LS 10300MM	\$ 105.00
Optional Support Foot (L)	LS 101200MM	\$ 105.00

Skylinebox

This is the most effective product on the market for high-quality skyline X-rays and makes taking skyline exams easy because of the unique built-in angle.

After exposure, it is effortless to open and to reload the tunnel without replacing the horse.

The Skyline tunnel is available for all sizes of analogue and CR cassettes.

- Made of polycarbonate 0.4"
- 4 rubber feet and an anti-slip surface
- Skyline angle 5°

Size	Itemnumber	Price
18 x 24	SK 05182420	\$ 415.00
24 x 30	SK 05243020	\$ 415.00
8" x 10"	SK 05232820	\$ 415.00
10" x 12"	SK 05283320	\$ 415.00

Combibox

The Combibox has all the features of the Skyline tunnel above and can additionally be used for LM / AP, flat and upright pedal takes when turned over.

With the optional Podoholder, the Combibox creates a hands-free system that allows for making Skyline, LM and AP X-rays of the foot. For optimal results, use it in combination with the Dummy to have both feet at the same height.

The Combibox is available for all sizes cassettes, both analogue and CR.

- Made of polycarbonate 0.4" and 0.7"
- 2.75" in height
- Rubber feet and an anti-slip surface
- Skyline angle 5°

DENTAL X-RAY SOLUTIONS

At the start of our company, we could not have envisioned the demand for dental X-ray solutions we get these days. But, after introducing it almost 10 years ago, it soared, and now we lead the way with practical solutions.

In this chapter, we have several standard products to improve and simplify these usually tricky tasks.

Denfinity

This lightweight, portable and collapsible stainless steel stand offers you the freedom to make high-quality Skull X-rays in a hands-free fashion. The Denfinity stand is a fully stainless steel base plate and vertical telescopic pole that guarantees a secure positioning and correct height adjustment.

Configuration and Combination Possibilities

The Base

You can configure the base plate and pole with several options that can quickly and directly be placed on the Denfinity base.

The 3D-Joint

The aluminium 3D-joint is a rotating head joint that securely attaches our DR-Buckybox and DR-Cowboybox.

The LM-Head Support

In combination with our Protectionbox, Podo-Protectionbox, DR-Buckybox and DR-Cowboybox and fixates your CR-Cassette or DR-Flatpanel for best usage.

The DR-Buckybox

Secures your Cassette or Digital Flat Panel when used in combination with the 3D-joint and LM-Head support.

Note: When ordering the optional CR-Cassette or DR-Flat panel solutions, be sure to state the required cassette measurements you use.

Denfinity Options

A. Base Element

Base plate: : 14" x 16" x 3.5"
Vertical pole: 38"
Vertical travel: 24"
Material: Stainless steel

B. 3D-joint

Aluminium 3D-swivel joint used in combination with DR-Buckybox or DR-Cowboybox

C. LM-Head support

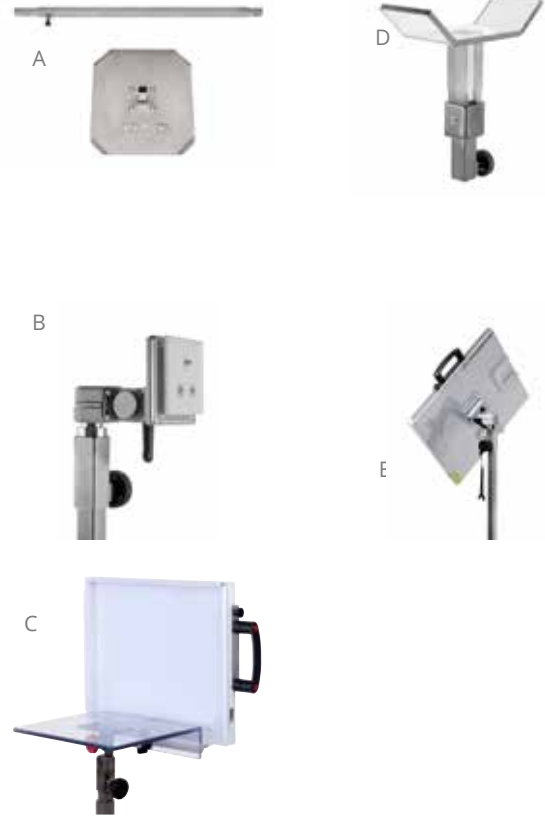

Polycarbonate 0.4" Swivel range: 180° Universal adapter for fixation of all CR-Cassette & DR-Flat Panel Solutions

D. Headrest

Polycarbonate 0.4"
Full radiolucent, no metal parts in the detection area

E. DR-Buckybox

Material: Polycarbonate 0.12".
Fully closed cassette which requires 3D-joint to function

Product	Itemnumber	Price
Base Element	DSJ 1050401	\$ 765.00
3D-Joint	DSJ 10DNL3D	\$ 585.00
LM Head-support	DSJ 10LMHEAD	\$ 495.00
Headrest	DSJ 10HREST	\$ 275.00
DR-Buckybox Wired	All Series	\$ 845.00
DR-Buckybox Wireless	All Series	\$ 845.00

Note: Revert to pages 19 and 21 - 29 for more information on All Series.

XtandR

The XtandR is a revolutionary set of interchangeable radiolucent bite plates for equine head radiographs. The XtandR is only intended for taking X-rays of the incisors. They are entirely universal to fit all speculi available in the market.

According to the official DAkKS-DKD-R 3-3 regulation, these radiolucent bite plates have been tested and can withstand a pressure of 5,13 kN / 513 kg.

- Material: HMPE1000
- Can withstand a pressure of 5,13 kN / 513 kg

Product	Itemnumber	Price
XtandR	RBP 10REGU	\$ 575.00

Radiolucent bite plates sample X-ray

The Juliuster

Designed, tested and approved in collaboration with the European Equine Dental Consultancy.

Easy-to-use device to offset the lower jaw to the left or right for open-mouth views with offset-technique.

Great to investigate the roots and the occlusion surface of the cheek teeth. Dorso-ventral views can be made with a 0.2" offset to the left and right.

- Material: HMPE500
- Offset: 0.2" left/right
- Adjusted in 0.5" increments
- Strap: 58" BioThane

Product	Itemnumber	Price
Juliuster	DRS 1011560	\$ 445.00

Dental X-Block

Can be used directly between the incisors to quickly create 60, 80 or 100 mm space.

- Material: Rubber 95° shore
- Weight: 1.4 lbs
- Size: L 2.4" x W 3.2" x H 4.0"

Product	Itemnumber	Price
Dental X-Block	DXB 106810	\$ 95.00

DR FLATPANEL SOLUTIONS

Digital Radiography (DR) techniques have evolved rapidly in a relatively short period, not just concerning software but also hardware, maybe even more so.

The first DR flat panels were a heavy, wired and inconvenient version of what they are today, yet suitable for most equine vets.

The evolution to thin, light-weight, wireless and easily manageable flat panels was a rapid one and has been a constant challenge for us to keep up with the changes and developments on the market and provide adequate solutions.

With our DR-product package, we believe we have the most appropriate solution for today's equine vet. At least we can't envision a practice without it! Overall, we cover 50 brands of flat panels in the market.

DR-Protectionbox

- Light-weight protectionbox - Handheld
- Depending on your DR-system, the box comes with a mounted grip handle or with our Greppstr 2.1 (see P 63)

Product	Itemnumber	Price
DR-Protectionbox Wired	All Series	\$ 635.00
DR-Protectionbox Wireless	All Series	\$ 685.00

DR-Podo-Protectionbox

Protectionbox with 0.2" adapters to place in our Podoblock and Combibox, that guarantees the same direction and angle with hoof examinations at all times. Depending on your DR system, the box comes with a mounted grip handle or with our Greppstr 2.1 (see P 63)

Product	Itemnumber	Price
DR-Podo-Protectionbox Wired	All Series	\$ 635.00
DR-Podo-Protectionbox Wireless	All Series	\$ 685.00

DR-Pouch

A radiolucent pouch that protects your fragile and expensive X-ray panel from outside influences during handling!

Our DR-Pouch is available from stock in all ISO measurements (see page 21) and other sizes & models are on request available.

It comes with:

- Synthetic leather on the outside with marked detection area
- One long side and one short side are made of transparent material to get access to switches and view LED's
- Thermo-plastic strap handle covered with rubber grip for comfort carrying
- Fast and convenient zipper closure on one long side for ease access

Product	Itemnumber	Price
DR-Pouch	All Series	\$ 365.00

DR-Cowboybox

Protectionbox, Podo-protectionbox and Remote cassette holder all-in-one.

Standard with mountable telescopic grip, which rotates in 3D positions to get extra distance and a mountable and height-adjustable 12" Support Foot.

For enhanced distancing from the x-ray source and thus the radiation exposure, the DR-Cowboybox is ideally compatible with the Denfinity, Bucky Lite and Stat-X Bucky Stand.

Depending on your DR system, the box comes with a mounted grip handle or with our Greppstr 2.1 (see P 63)

Product	Itemnumber	Price
DR-Cowboybox Wired	All Series	\$ 995.00
DR-Cowboybox Wireless	All Series	\$ 995.00

DR-Cowboy Package

The optimal combined package of DR Products to make all X-rays needed, both safely and in a standardized fashion.

The package deal includes:

- Podoblock
- DR-Cowboybox
- DR-Combibox LM / AP
- Combibox Dummy LM

Product	Itemnumber	Price
DR-Cowboy Package Wired	All Series	\$ 3,050.00 *
DR-Cowboy Package Wireless	All Series	\$ 3,050.00 *

* Combi-Deals: \$85 discount on sale price

DR-Buckybox

The DR-Buckybox is a new affordable alternative version of our X-ray cassette protection case, similar to our DR-Cowboybox. The DR-Buckybox is ideally compatible with the Denfinity, Bucky Lite and Stat-X Bucky Stand.

- Available from stock for all current DR Flat Panels
- Perfect fitting box and secured with locking door
- The Polycarbonate box comes with the Greppstr 2.1 universal handgrip (for wireless Flat panels) for easy carrying

Product	Itemnumber	Price
DR-Buckybox Wired	All Series	\$ 850.00
DR-Buckybox Wireless	All Series	\$ 850.00

Note: see page 32 for detailed description of the DR-Buckybox.

Note: Revert to pages 21 -29 for more information on all supported Flat Panel Detector brands

DR-Skylinebox

This product is a full protection box made of 0.8” polycarbonate material that withstands the weight of the horse’s foot while in standing position during X-ray exams.

Because of the particular angle, the horse is standing comfortably, and there is more space for the generator. The top surface comes with a translucent anti-slip surface. A lock secures the opening of the insert.

- Material: 0.8” polycarbonate

Product	Itemnumber	Price
DR-Skylinebox	All Series	\$ 725.00

DR-Combibox LM

The Skyline side of the DR-Combibox has the same features as the original DR-Skylinebox. Because of the unique angle, the horse is standing comfortably, and there is more space for the X-ray generator. When turned over, the tunnel has extra features to facilitate LM flat views of the foot. The special adapters on the DR-Combibox allow you to take “hands-free” X-rays in combination with our DR Podo-Protectionbox, DR-Cowboybox or DR-Buckybox. This way, the DR-Flatpanel is protected and always in the right position.

DR-Combibox LM / AP

The DR-Combibox LM / AP has the same features as the DR-Combibox LM but with the option to facilitate AP flat views of the foot.

This way it is not necessary to replace the foot for both exams.

Product	Itemnumber	Price
DR-Combibox LM	All Series	\$ 1,095.00
DR-Combibox LM / AP	All Series	\$ 1,150.00

Combibox Dummy LM

The DR-Combibox Dummy LM lifts the equine foot to a higher level. The special adapter on the Dummy block allows you to take “hands-free” X-rays in combination with our DR Podo-Protectionbox or DR-Cowboybox.

- Size: : L 9.3" x W 6.3" x H 3.5"

DR-Combibox Set

Both standing feet on the same height is advised with LM and AP examinations. That is why our Combibox Dummy can also be supplied with the DR-Combibox.

The Combibox Set is included:

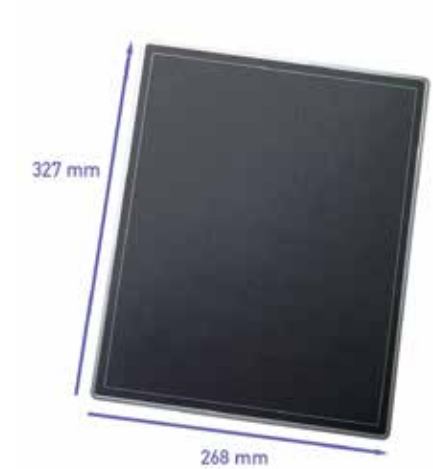

- DR-Combibox LM / AP
- Combibox Dummy LM

Product	Itemnumber	Price
Combibox Dummy LM	CO 06DUM081DR	\$ 295.00
DR-Combibox Set	All Series	\$ 1,395.00 *

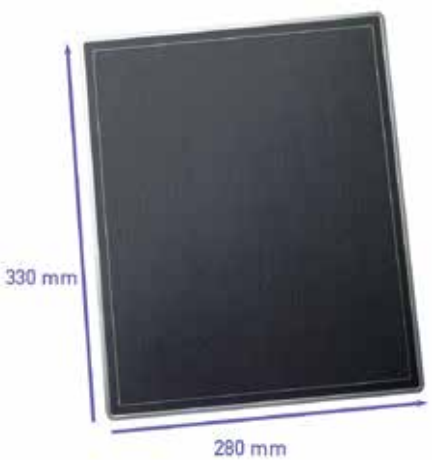

* Combi-deal: \$ 50,- discount on sale price.

BUCKY SOLUTIONS

The use of radiography is hazardous and very stressful for the daily working conditions of the vet and the veterinary assistant. When taking X-rays, radioactive radiation is released, and it is crucial at what distance a person and/or animal stands from the X-ray generator and how this person is exposed to the radiation.

This chapter focus on solutions that increase the distance for imaging professionals who are likely exposed to the harmful effects of radiation during X-ray takes.

BUCKY SOLUTIONS

Denfinity

This light-weight portable and collapsible stainless steel stand offers you the freedom to make high-quality Skull X-rays in a hands-free fashion.

The Denfinity stand is a fully stainless steel base plate and vertical telescopic pole that guarantees a secure positioning and right height adjustment.

Starting with the base element of the Denfinity, the base plate and pole, you can configure with several options that can quickly and directly be placed on the Denfinity base.

The aluminium 3D-joint is used in combination with our Protectionbox.

The Protectionbox secures your Cassette or Flatpanel when using in combination with the 3D-joint.

Bucky Lite

The Bucky Lite is a mobile stand for mounting one of our X-ray cassette protection boxes (DR-Buckybox or DR-Cowboybox). The stand can easily be adjusted to a suitable height for the perfect X-ray result. It is collapsible and built with light-weighted material for easy transport or carrying around. It is the perfect equipment that is efficient and practical for your daily working environment.

To set up, push down the slide bar located on the vertical tube, and the connecting base wheels will extend outwards and set into a working position. It requires no tools or skills and no loose components. The whole process takes only 5 seconds!

For added usability and compatibility, there is a slide & lock adapter at the top of the tripod for connecting to the integrated 3D adjustable joint to our (optional) DR-Buckybox or DR-Cowboybox. It takes only 2 seconds!

- Light-weighted aluminium material
- Foldable, retractable and movable tripod
- Maximum height of 3D-joint is 59.1"
- Vertical travel of the telescopic tube is 24"
- Easily transported with a weight of 10 lbs
- Folded dimensions L 37" x W 9.1" x H 9.1"
- Comes with 5 swivel wheels (2 with a locking brake)

Product	Itemnumber	Price
Denfinity Base Element	DSJ 1050401	\$ 765.00
Denfinity 3D-Joint	DSJ 10DNL3D	\$ 585.00
Bucky Lite	BSL 09VIO3D	\$ 1,295.00

DR-Buckybox

The DR-Buckybox is an affordable new version of our X-ray cassette protection case, similar to our DR-Cowboybox. It is specially designed for optional use with the Denfinity stand and the Bucky Lite stand.

Located on the backside of the DR-Buckybox is a slide & lock adapter system that allows efficient and secure manoeuvring during X-ray exams. This makes the DR-Buckybox compatible with the following Podoblock products:

- Denfinity (type: 3D-joint)
- Bucky Lite
- Stat-X Bucky
- Distance Stick (type: DR-Cowboybox)
- Support Foot

Technical Specifications:

- Available from stock for all current DR Flat panels
- Perfect fitting box and secured with locking door
- The Polycarbonate box comes with the Greppstr 2.1 universal handgrip (for wireless Flat panels) for easy carrying

Product	Itemnumber	Price
DR-Buckybox Wired	All Series	\$ 850.00
DR-Buckybox Wireless	All Series	\$ 850.00

Note: Revert to pages 19 and 21 - 29 for more information on All Series.

Stat-X Swingarm Bucky

The Bucky Swingarm has a weight-bearing capacity from 48.8 up to 33.0 lbs, where the 8.8 – 15.4 lbs is most convenient for all systems. For added usability and compatibility, there is a slide & lock adapter at the Bucky Swingarm for connecting to the integrated 3D adjustable joint to our (optional) DR-Buckybox or DR-Cowboybox. See page 19.

Swingarm Types	Itemnumber	Price
Bucky 4,0 - 15,0 kg	SA 09750-DNL 4-15	\$ 2,395.00

Stat-X Bucky

With our Stat-X Bucky, you have the most advanced, all-purpose mobile stand that will fully satisfy your needs in your daily working environment.

The Bucky can be ordered with optional short legs (19.7" instead of 35.4") and extra counterweight (14.3 lbs).

For added usability and compatibility, there is a slide & lock adapter at the top of the Swingarms for connecting to the integrated 3D adjustable joint to our (optional) DR-Buckybox or DR-Cowboybox. It takes only 2 seconds!

Technical Specifications:

- Swing arm length: 29.5"
- Vertical travel arm: 27.5"
- Vertical travel stand: 16.1"
- Max height bracket: 72.8"
- Weight X-ray cassette / Panel: 8.8 – 44.1 lbs
- Transport size: L 43.3" x W 11.8" x H 12.6"
- Weight: 48.5 lbs
- Color: PMS260C Satin

The Stat-X Bucky is compatible with our DR-Cowboybox and the DR-Buckybox, but it comes without a Cassette or Panel holder, these can be ordered separately. See page 19.

Weight X-ray cass/panel	Itemnumber	Price
4,0 – 15,0 kg	BSM 09750 4-15	\$ 5,250.00
Short legs / extra counterweight	RSM 09SLEW	\$ 345.00

ULTRASOUND SOLUTIONS

It's not just X-ray accessories Podoblock has to offer. We also have been a key player in the field of ultrasound. As ultrasound machines have developed at a rapid pace, and thus have become compact and mobile, we offer a range of support products.

Take, for example, the SCANDroid, that has proven itself to be an indispensable and must-have product, also outside the ultrasound sphere.

On the following pages, you will find all the scanning solutions you'll ever need.

U-scan

Our own standoff, adaptable for a wide range of linear-array transducers.

- Thickness sides: 0.3"
- Thickness bottom: 0.5"
- Comes in a protective box

Note: We supply all available kinds of standoff on request.

Flabbus Ultrasound Standoff

The Flabbus Ultrasound Standoff is an exceptionally elastic item, conforming to patient contours while maintaining uniform thickness and universal application to each type of Probe head.

Flabbus Ultrasound Standoff is made of a proprietary synthetic gel, resulting in a moulded material that does not suffer inelastic strain from everyday stresses.

Consequently, the Flabbus Ultrasound Standoff does not have to be bagged or wrapped in plastic film to maintain its shape and can be easily stored.

For optimal use, the user can cut it to his/her preferred size-of-use with the supplied scissors. For example, the 300 x 300 mm Flabbus can be cut into six smaller parts of 100 x 150 mm.

Any other size is a possibility, depending on personal choice.

- Size: 118" x 118"
- Thickness: 0.12" or 0.2"

SCANDroid

The ideal, height-adjustable scan stool for the mobile veterinarian to transport to the job site or for clinic use. The SCANDroid has excellent stability with a total of 5 castor wheels, 2 of which with a locking device. The gas spring allows for a stageless height-adjustment and can be upgraded with an optional Extension pipe. Upgrade your SCANDroid bottom tray with a Coverplate to protect the bottom of the SCANDroid from dust and dirt. The Coverplate can be customised with your own logo.

- Transport: Ø 15.7" x 9" height / 20.5 lbs weight
- Maximum weight bearing gas spring is 110 kg

Working heights are as follow:

- SCANDroid: 9.1" + 15" – 20.1"
- SCANDroid with Extension Short: 9.1" + 15" – 25.2"
- SCANDroid with Extension Long: 9.1" + 15" – 20.1" + 25"- 30"
- SCANDroid with Extension Short and Long: 9.1" + 15" – 30"

Professional Equine Vet Review

“This new Podoblock SCANwedge is very helpful in performing the hyperextension-test of the coffin joint. The different structures can be stressed individually. Both navicular bone and bursa, with deep digital flexor tendon are easily put under tension and pressure by lifting up the toe.

By placing the wedge from the side under the hoof it is easy to put tension on the collateral ligaments of the toe and pressure on the joint surfaces of the opposite side.

The wedge is a very good tool to make a precise diagnosis in clinical lameness exam. Furthermore, the wedge can be used to perform a better ultrasound of the collateral ligaments of the coffin joint. The ligament can be visualized more distally by stretching it a bit out of the hoof capsule.”

Dr. med. vet. Claudius Krieg
Pferdepraxis Equine-Vet

SCAN Wedge

Straight-forward wedge for extra extension to be placed under the hoof when conducting hyperextension-test of the coffin joint.

- Material : Rubber 95° Shore
- Dimensions: L 7.1" x W 5.9" x H 2.6"- 0
- Angle: 20°

OPU ProbeHolder

Our new ovum pick-up (OPU) probe holder is the ideal device for ovum ultrasound and is compatible with most ultrasound brands on the market.

With the ProbeHolder, you have an innovation that makes equine OPU ultrasound processes simpler, faster and more comfortable for both vet and horse.

The unique construction, material and size of this innovative product are the attributes that make it valuable. It comes equipped with an integrated needle chamber which can be (optional) supplied with a stainless steel needle guide.

Placing your Ultrasound probe is quick and easy and requires only one locking screw through the handle with integrated magnets secure it all.

ProbeHolder:

- Material: HMPE – Blue
- Dimensions: L 20.5" x W 2.4" x H 7.1" (including the removable handgrip)
- One (red) locking screw
- Two integrated magnets for quick locking
- No additional tools required
- The removable handgrip can be placed on three sides
- Transport case included

Needle guide:

- Material: stainless steel
- Dimensions: 21.1" total length
- Outer diameter 0.2"
- Inner diameter 0.13"
- Fits perfectly in the Probeholder
- No additional tools required
- Trumpet piece for easy and safe access with the needle

Duo Laser Pointer

This ingenious device is compatible with all X-ray generator on the market. With magnetic functions and a few screws, attaching the laser pointer couldn't be simpler! The focus distance is flexible and adjustable.

By converging two laser points, the measurement of the correct distance is a breeze, saves time, and eliminates uncertainty.

The pointer runs on six LR44 batteries (installed) that can be changed whenever you want.

Stat-X Family Models

With our Stat-X family models, you have the most advanced, all-purpose mobile stand that will effectively create efficient solutions in your daily working environment. On the following pages, we have outlined features of the Stat-X options we offer, which you can explore, combine and order the stand with add-on possibilities of your choice. To make the ordering process easier for you, we've outlined the choice of options and all the available basic models on the following pages, so you can easier decide whether you need a small or a large version of the Stat-X mobile stand.

The Stat-X Options

Swingarm

Swingarm Espléndido

Available in 2 variations:

- Swingarm 29.5" Vertical travel 26.4" Load capacity: 13.2 - 31 lbs
- Swingarm 22.8" Vertical travel 19.7" Load capacity: 31.1 - 50.7 lbs

Swingarm Vaquero

Available in 2 variations:

- Swingarm 750 mm Vertical travel 26.4" Load capacity: 13.2- 35.4 lbs
- Swingarm 22.8" Vertical travel 19.7" Load capacity: 35.5 - 55.1 lbs

The quick-release system will rapidly position the swingarm in all desired heights.

3D-Head

The 3D-head gives you twelve fixed 12° positions with a maximum of 35° to either side and can be turned totally upside down. The 360° rotation with staged locking of the source secures an accurate position for both skyline views and head X-rays. The 3D-head will provide for all portable generators available on the market.

Short Legs

All Stat-X stands (except for the Stat-X Espléndido) are available for stationary use with short legs and extra counterweight to create more working space between horse and stand. A counterweight at the back of the stand will prevent it from tipping over.

All Stat-X models are CE-marked Class 1 medical products European Medical Devices. MD 93/42/EEG NL-CA002-2012-24232

PROTECTION & SAFETY

Radiation protection is pivotal to all X-ray exams. It's the alpha and the omega.

Fortunately, we offer a complete range of products to protect our users against radiation optimally.

With personalized sizes and colours, we have tried to make our product line suitable for all our customers.

We have solutions for all environments, be they stationary at your clinic or in a mobile environment - on any location.

Apron 'The Basic Buckle'

This apron is our most economically priced frontal apron, equipped with a 2" Buckle with a Velcro shoulder strap to keep the apron snugly fitted during work. The accessory is Thyroid Shield included and has a convenient magnetic MAGNAGUARD™ closing, instead of Velcro. The Pb-free version is made of new material, consisting of 12 metals, and is lead-free. It is more flexible, lighter, and has the same protection value. (Pb 0.5 mm equivalent)

Made in the USA, this apron guarantees quality and maximum protection!

Scinti Solutions

These standard blocks are made to elevate the horse's foot to the desired height in 2 stages, single or stacked.

The blocks are made without any metal parts, in order to avoid interference with Scintigraphy and comes with 3M anti-slip cover.

Get 2 sets of blocks (4 in total) on which to position the horse. Stacking the blocks allows for a second, higher position of the horse.

The 2 available Covers come in 2 different sizes.

- 1 block measures 2.95" in height
- 2 layered blocks measure 5.71"

- The SET includes:
- 2 sets of 2 blocks
 - 1 small Cover, measuring L 30" x W 11" cm and Pb 1,5 mm
 - 1 large Cover, measuring L 30" x W 22" and Pb 1,5 mm

Both Covers each have 4 corner-grips for easier use and come in grey.

X-RAY MARKERS

Despite the digital revolution, the use of markers is still commonplace.

Isn't it convenient to be able to carry on doing this in the 21st century - as if it were the analogue era?

Sometimes there's just nothing wrong with being 'Old School'...

X-Ray Clip

Stainless steel clip for analogue and CR-cassettes.

- 2.16" x 0.83"
- Gap: 0.7"

X-Ray Clip DR

Multiclip that clenches around the edges of our boxes / sleeves.

- 3.74" x 0.98"
- Gap: 1.06"

Multimarker

Stainless steel all-in-one marker with suction cup.

- Ø 0.2"

Multiclip DR

Multiclip that clenches around the edges of our boxes or sleeves.

- Ø 0.2"
- Gap 1.06"

Sarah Marker

Marker with integrated label to always be sure about the horizontal plane.

Buckymarker

Marker with suction cup or clip for your cassette holder to provide information about the horizontal plane.

- 360° rotation
- Size: L 1.9" x W 1.73" x H 0.16"

Left & Right X-Ray Lead Markers

- Deluxe, lightweight plastic casing
- Increased durability and an exceptional finish
- Vertical orientation
- Right & left characters are 0.63" each
- Sold as a set of markers (left & right)
- Colour: Red & Blue

SPECIAL X-RAY SOLUTIONS

After our early-day inventing and producing of several X-ray accessories, we received a steady flow of demand for specialized and customized products to enhance and professionalize the quality of X-rays.

All these inventions have meanwhile become mainstream in our product line and can usually be delivered from stock.

Antiscatter Grid

Our anti-scatter Grid's are always produced on customer request and therefore will create the most effective device for reduction of scattered radiation. Made of very thin lead strips with the spaces between the strips that are filled with low-attenuating material.

- Grid covers can be from Aluminium (standard) or Carbon fibre (optional) material
- Grid specifications (Focused or Parallel, Focus Distance, Lines per cm, Ratio, Portrait or Landscape model and exact sizing) can be set by ordering
- Below you will find listed the most common sized Focused and Parallel Grid with Aluminium and Carbon fibre covers with their corresponding pricing
- Other specific Grid specifications don't interfere in the pricing
- Grids are always produced on request (lead times 4-6 weeks), therefore no return possible

Product	Model and Size		Itemnumber	Price
Alumunium cover / Focused	24 x 30	Size: 268 x 327 mm	AFG 10ISO2430	\$ 1,285.00

MISCELLANEOUS

Changing a horseshoe is ideally done by a farrier, but when you - as an equine veterinarian choose to do so, we have several professional and ingenious tools for you, lined out in this chapter.

You will also find, for instance, our Hoofplaster, that is already used in many practices, to enhance navicular bone X-rays.

Analogue
- Measuring range: 360°
- Velcro base

Digital
- Measuring range: 360°
- Magnetic base, tilt display
- 2 AAA batteries included

VET Tools

A comprehensive set of tools to get you going, quickly and safely.

VET Tools Set includes:

- Apron "VET"
- Soft-faced Hammer
- Clench Cutter
- Straight Blade
- Loop Knife
- Nail Puller
- Pull-off
- Adjustable Hooftester
- Canvas Storage Bag

Product	Itemnumber	Price
Apron "VET"	VV 10VET	\$ 275.00
VET Tools Set	VV 10SET	\$ 1,045.00

Adjustable Hooftester

Easy-to-use, adjustable hooftester.

- Stainless Steel

Hooftester

- Easy to use and durable stainless steel equine hoof tester

Product	Itemnumber	Price
Adjustable Hooftester	VV 10WERK07	\$ 210.00
Hooftester	VV 10WERK08	\$ 95.00

123 Shoeing Kit

Use this indispensable high-quality farrier-hammer with the clinch cutter for removing 'hidden' nails during de-shoeing.

- Shoe Puller
- Hammer
- Clinch Cutter

Product	Itemnumber	Price
123 Shoeing Kit	PZT 10123SK	\$ 195.00

Aiangle

A great device to measure the exact angle. It is easy to place on both your generator and Cassette Holder. We supply a digital and an analogue version.

Product	Itemnumber	Price
Analogue	AI 10AN1C	\$ 65.00
Digital	AI 10RAS2C	\$ 65.00

PARTS & SPECIALS

It's always a pain in the neck when you lose stuff or leave it at some location, and you forget where you saw it last. And then it's a relief to find out there's a company that has spare parts in stock.

Greppstr 2.1

This universal grip handle can be used on a number of our DR-products:

- DR-Protectionbox
- DR-Podo-Protectionbox
- DR-Cowboybox
- DR-Buckybox

Product	Itemnumber	Price
Greppstr 2.1	GH 10120M8-12	\$ 105.00

Distance Stick

These sticks can be used on several products for CR Cassette solutions and DR-Flat panel solutions.

Please make sure you choose the correct one.

For Product	Itemnumber	Price
CR-Distance Cassette Holder	GH 10STICK-1	\$ 105.00
CR-Kneeholder	GH 10STICK-2	\$ 105.00
DR-Cowboybox	GH 10STICK-3	\$ 105.00
DR-Buckybox	GH 10STICK-3	\$ 105.00

Support Foot

This Support Foot can be used on several products for CR Cassette solutions and DR-Flat panel solutions.

They are universal and work with the CR-Distance Cassette holder with foot option, our DR-Cowboybox and DR-Buckybox.

Size	Itemnumber	Price
11" - 19.2"	LS 10300MM	\$ 105.00
39.4" - 74.8" cm	LS 101200MM	\$ 105.00

EMERGENCY & CARE

In order to diversify our already sizable product line, we also want to be able to offer you components in the field of care products for our equine friends.

It is highly conceivable this chapter will be expanded in the near future in order to present an even more comprehensive set of tools to help you improve your daily tasks as an equine veterinarian.

Every year thousands of foals are born with flexural or angular limb deformities or deviations at the level of the carpus or fetlocks - avoiding that they reach their optimal performance level later in life.

Redboot reintroduces the use of external co-optation with a revolutionary line of boots, braces and prostheses, specially designed in both lighter and durable materials that adapt anatomically and with comfort, avoiding the injuries that can be produced by old fashioned devices.

Corrective Foal Boot

The Corrective Foal Boot is designed to be used in all fetlocks for:

- Correction of Flexural Limb Deformities or contracted tendons
- Correction of Angular Limb Deformities or toe-in / toe-out conditions
- Prevention of acquired retraction due to pain-post-injury
- Permanent or temporary immobilization of the distal limb (for better management of fractures, tendon or ligament injuries and wounds)

The Corrective Foal Boot comes in one-size-fits-all.

Product	Itemnumber	Price
Redboot Corrective Foal Boot	RED 13CFB	\$ 595.00

Emergency Compression Boot

The Emergency Compression Boot can be used for:

- Immobilization of distal limbs
- Emergency breakdown stabilization
- Condylar, sesamoid or P1, P2 and P3 fractures (where normal alignment is required)
- Wound management (where immobilization is required)

The Emergency Compression Boot comes in 2 sizes: Regular and Large.

Product	Itemnumber	Price
Redboot Emergency Compression Boot (R)	RED 13ECBR	\$ 695.00
Redboot Emergency Compression Boot (L)	RED 13ECBL	\$ 695.00

Articulated Corrective Brace

The Articulated Corrective Brace can be used in the full front limbs for:

- Correction of Flexural Limb Deformities or contracted tendons
- Correction of Angular Limb Deformities or Carpus Varus/Valgus
- Prevention of acquired full limb retractions (due to pain)
- Permanent or temporary immobilization of the full limb

This model also comes in two sizes: Regular and Large.

Product	Itemnumber	Price
Redboot Articulated Corrective Brace (R)	RED 13ACBR	\$ 995.00
Redboot Articulated Corrective Brace (L)	RED 13ACBL	\$ 995.00

Equine Limb Prosthetics

SCANster + ProbeRack	VS 1045321910 C	€ 1,085.00

The DRagster

The new DRagster veterinary cart comes upgraded with larger wheels for enhanced stability and a pull-out handle for transport, thus increasing portability.

The cart is built with durable aluminium material, height-adjustable and suitable for heavy machines and equipment. Three positions height adjustment, 10", 22" and 34"

- It can be stored in a vertical position to save space
- Easy transport position with the pull-out handle
- It works great as a mobile cart for small and oversized equipment.
- And also for your DR-flat panel suitcase

Optional with professional ProbeRack to store in total 2 ultrasound probes and gel bottle.

- Transport: W 22" x D 17" x H 10"
- Total weight: 32 lbs
- Tray Dimensions : W 22" x D 17"
- Max. load: 77 lbs
- 2 big Ø 8" wheels
- 2 locking Ø 15" castors

Position 1: 10"

Position 2: 22"

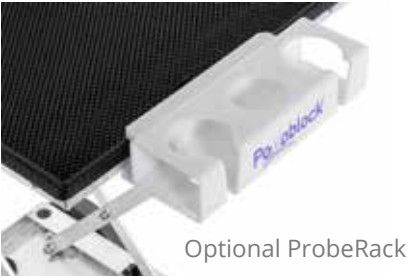

Position 3: 34"

Compact Storage Position Smooth & Efficient Transport

Optional ProbeRack

Mobile WorkStation

The Mobile WorkStation is a sophisticated, compact, comfortable and flexible construction that creates optimal mobile working space for every mobile professional.

The WorkStation is entirely customizable and upgradeable with StorageBoxes and Upgrade units to create a system that can be easily transported, assembled and disassembled by one person and quickly loaded into a vehicle.

- Colour: Black/Light Grey
- Material: ABS, Aluminium
- Dimensions: H 35" x W 24" x D 26"
- Weight: 66 lbs
- Upgrades: 13

Features

- Completely customizable
- Numerous upgrades possibilities
- Compact and solid

Benefits

- Build the system you need to get the job done
- Lightweight for easy transport
- One person assembles and disassembles

Build your own mobile workstation in 4 steps

Step 1 – Start with a Base element

This Base Element can be upgraded with StorageBoxes and Upgrade units to create a system that can be easily transported, assembled and disassembled by one person and quickly loaded into a vehicle.

Base element

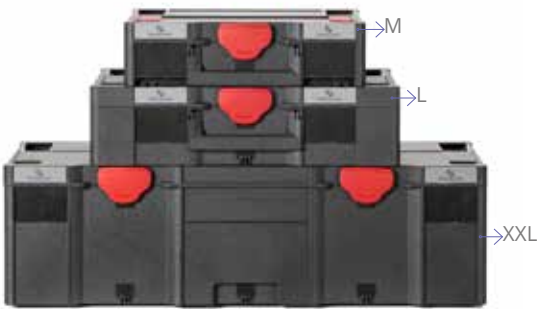

Step 2 – Choose your upgrades - listed on page 74

Choose from 13 convenient upgrades, which can make your work easier.

Step 3 – Choose your StorageBoxes and Drawers

- The boxes are designed to securely stack on top of each other with a Twist&Lock knob. The WorkStation's Base element also has a Twist&Lock knob for securing boxes. The stacking possibilities are unlimited.
- You can stack up the StorageBoxes and Drawers to 68 cm high on the Mobile WorkStation. Need more boxes for your equipment? No worries, you can easily change boxes on the Mobile WorkStation. Another option is to take extra boxes to the mobile workplace on a Transport Base Element (page 74). For safe transportation, a Stationary Base Element is available which secures the StorageBoxes in the car (page 74).
- The StorageBoxes come in 3 standard sizes Medium, Large and XXL. These sizes indicate the width of the box. Within the sizes, the boxes have different heights. There are 15 different boxes to choose from (page 74):

- | | |
|-----|-------------------|
| M | W 15.6" x D 11.7" |
| L | W 20" x D 11.7" |
| XXL | W 31.2" x D 11.7" |

Twist&Lock knob

Step 4 – Order your mobile workstation or request a demo

Would you like to see a demonstration to check out the possibilities of the Mobile WorkStation? You are always welcome to visit our workplace in Tynaarlo (NL), we can give an online demonstration or we can look for a possibility to give a demonstration on location. Just make an appointment by contacting us.

Recomended configurations

To make it easy, we have compiled 4 configurations of the most purchased Mobile WorkStations

Mobile WorkStation
Equine Vet Essential

This configuration of the Mobile WorkStation consists of the essential upgrades and boxes for working properly. A good economical set to start with.

- Mobile WorkStation options *:
- Base Element
 - 3 Upgrades
 - 4 StorageBoxes

Mobile WorkStation
Equine Vet Professional

This extended configuration of the Mobile WorkStation has all the necessary upgrades and boxes to create a professional and fully equipped Mobile Workstation for each equine veterinarian.

- Mobile WorkStations options *:
- Base Element
 - 7 upgrades
 - 4 StorageBoxes

* See Page 74/75 for Upgrades and StorageBoxes

Mobile WorkStation
Equine Dental Essential

This configuration of the Mobile WorkStation consists of the essential upgrades and boxes for working properly as a equine dental veterinarian. A good and economical set to start with.

- Mobile WorkStation options *:
- Base Element
 - 3 Upgrades
 - 4 StorageBoxes

Mobile WorkStation
Equine Dental Professional

This extended configuration of the Mobile WorkStation has all the necessary upgrades and boxes to create a professional and fully equipped Mobile WorkStation for each equine dental veterinarian.

- Mobile WorkStations options *:
- Base Element
 - 6 Upgrades
 - 5 StorageBoxes

Mobile WorkStation StorageBox

The StorageBoxes come in 3 standard sizes - Medium, Large and Extra Extra Large. These boxes vary according to height and interior dimensions and are designed to securely stack onto each other with a twist&Lock knob that creates a perfect, uniformed and organised storage system - which can be placed directly onto your Mobile Workstation and easily into a veterinary car.

In addition, stacking possibilities are unlimited and create maximum mobility and organisation in a stationary or mobile job site.

StorageBox Types

- Medium (M) has the basic outside dimensions W 15.6" x D 11.7" is available in six different heights (See table below).
- Large (L) has the basic outside dimensions W 20" x D 11.7" is available in three different heights (See table below).
- Extra Extra Large (XXL) has the basic outside dimensions W 31.2" x D 11.7" is available in two different heights (See table below).

Material: ABS Plastic
